

Knowledge Management for Effective Global Health Programs

June 17-19, 2019

JHSPH Health, Behavior and Society
Summer Institute, Baltimore, MD

Register for the JHSPH Health,
Behavior, and Society Summer
Institute by May 24, 2019

Knowledge management (KM),
organizational learning (OL) and
adaptive management lead to better
development programs. This
introductory course:

- Introduces participants to KM, OL and adaptive management principles, processes, and tools, and their applicability to the design and implementation of global health efforts.
- Demonstrates, through real-life examples, how KM and OL can be applied to strengthen public health systems and maximize available knowledge to reach public health objectives.
