

Once I became circumcised my friends decided they should go as well.

I am helping to protect my wife from cervical cancer.

My wife and I are both happier I circumcised.

I got to know Soka Uncobe and realize this was something that was right for me.

I feel a part of history as a proud Swazi circumcised man.

Not only am I safer from HIV, I have protected myself better from STIs & penile cancer.

I asked myself how can I be a good father and Swazi man and not do this?

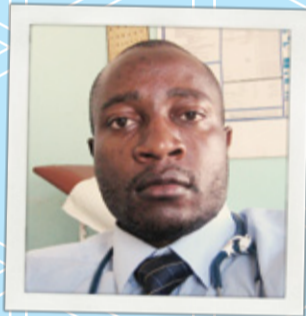

It is better: I am more hygienic and clean versus before.

Men are making Swaziland's future brighter! And you?

SAFER
from HIV!

Personal hygiene is much easier now that I'm circumcised.

I was happy to protect my wife from cervical cancer and because I would be cleaner.

I personally convinced three friends to circumcise after my excellent experience.

I came to know the medical benefits and the decision for me was an obvious one.

The procedure was extremely professional and the pain was nothing difficult.

I believe my future wife will appreciate that I have become circumcised already.

I am living a Christian lifestyle and I believe God wants us to protect ourselves.

Circumcision is right for my sons AND me.

I became circumcised to protect my family and myself.

I am safer from HIV and a better man.
